

PremierPack Plus

NOW with **NEW** Magnetic Cyclone

The new and improved Alpha Cyclone now includes a magnetic filter, providing better protection for the boiler by removing debris more effectively from the heating system.

Don't leave without one.

Make sure you always install Alpha InTec combination and system boilers using the PremierPack Plus wall-mounting jig.

Fit PremierPack Plus for long-term peace of mind

PremierPack Plus automatically adds an extra two years to the boiler's standard guarantee, giving you and your customers unparalleled peace of mind.

Fit PremierPack Plus for built-in protection

PremierPack Plus incorporates the new and improved Alpha Cyclone, which uses magnetic and centrifugal force to remove debris from the heating system. This in turn reduces the risk of damage to the boiler.

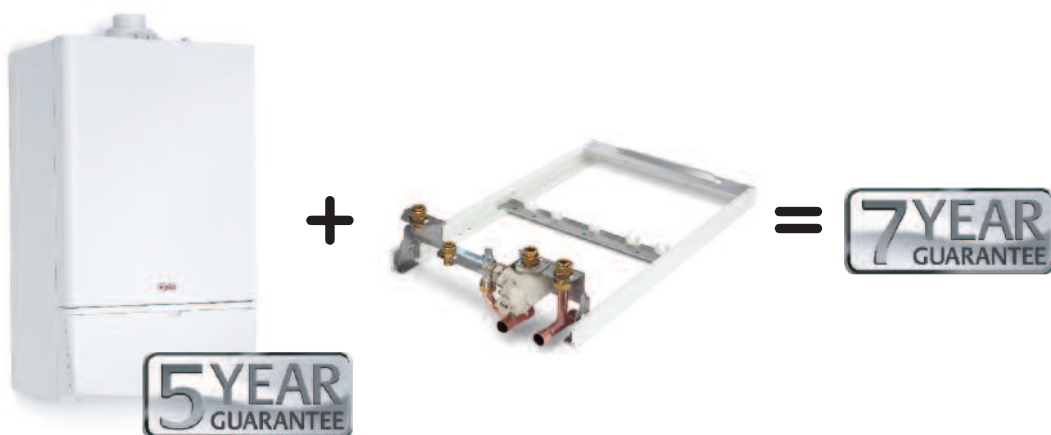

Fit PremierPack Plus for a quicker, easier and neater installation

- Split flow tails for piping from above
- Pipe clip plate with variable fixing points
- Pre-cut copper earth bonding plate
- Pipe cover tray
- PRV pipe terminal

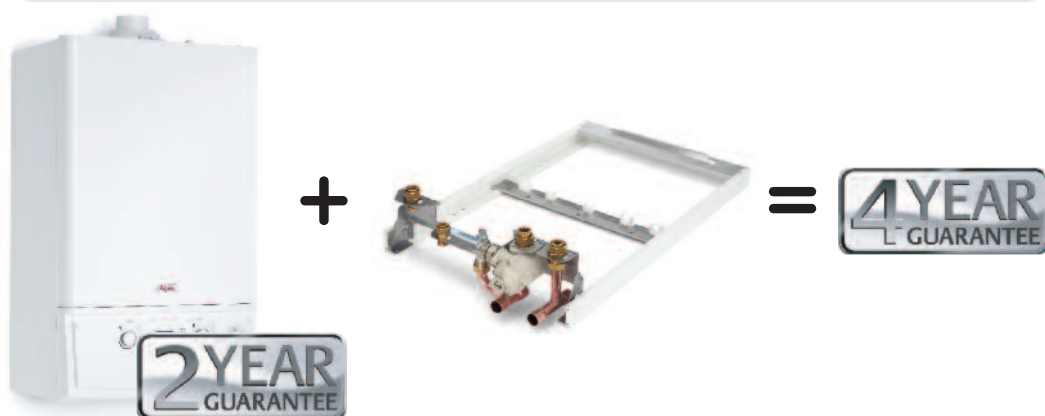

Alpha
HEATING INNOVATION

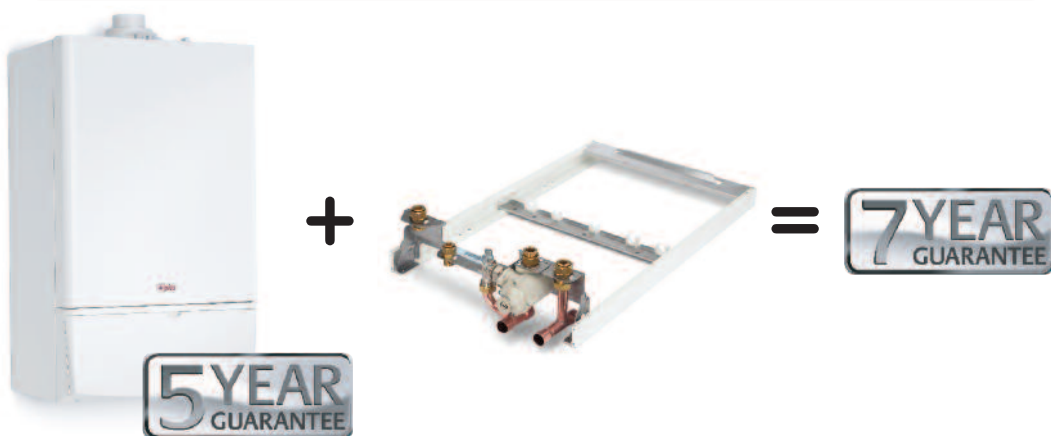

InTec C combination boilers - 26C, 30C & 34C

InTec X combination boilers – 24X and 28X

InTec S system boilers – 12S, 18S & 28S

InTec boilers can make a serious impact on energy bills:

- Increased 1:8 modulating range means reduced gas consumption
- Improved NO_x ratings
- Low electrical consumption in operating and standby mode

They come with a host of features including:

- Compact dimensions (720x440x300mm)
- Factory fitted valves and tails
- Stainless steel heat exchanger
- Frost protection and daily pump kick
- Grundfos pump and hydroblock assembly
- LCD display on control panel
- Detailed fault codes
- Easy access NTCs on front of pipes
